

AUTOMATIC CHARGER - INVERTER

Generates AC Electricity with 12V Battery

LCI series

Design features

- Suitable for computer, printer, cash register, fax machine, power tool, fluorescent lamp, fan, air pump, water pump, TV etc.
- Operates on 12V Battery
- 250 & 500 watts models available.
- Designed & built to cater for 24 hour operation a day.
- Built-in automatic battery charger to recharge battery in one hour time for one hour of inverter operation.

General Data

AC input	: AC 220V 50Hz	Indicators	: AC input on / charging battery LED
AC output	: AC 220V 50Hz		: Battery back-up LED
Protections	: AC input MCB		: Output power on LED
	: Battery MCB		: Battery low LED
	: Inverter output overload shut-down		: Output overload LED
Metering	: AC input MCB	Connections	: 1.5 meter AC input cable
Controls	: Power on/off switch and overload trip reset switch		: 1.5 meter battery cable
	: Cold-stat push button switch		: AC output socket
